PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 7+ years of experience building national-scale government systems, EdTech platforms, and enterprise ERPs. Specialized in **Laravel, NestJS, React.js, and MySQL**, with hands-on experience in AWS, Docker, CI/CD, and building **AI/LLM products**, including an in-house Bangla LLM tutor. Led teams of 4–6 developers and mentored junior engineers, delivering projects such as NCTB's nationwide book distribution system and an LMS serving 5,000+ students.

PROFESSIONAL EXPERIENCE

iHealthScreen Bangladesh *2021 – Present*

Senior Software Engineer Mohakhali DOHS, Dhaka

- Led a cross-functional team of 4–6 developers on large-scale government projects (NCTB, NAEM) and LMS platforms, delivering all milestones on time and within scope.
- **Laravel & NestJS:** Designed and implemented scalable REST API backends serving government and EdTech platforms, with Redis caching and Swagger documentation.
- Reduced book distribution processing delays by 80% through a nationwide automated distribution management system serving the NCTB.
- Built and deployed an Education Management System (MyClassRoom) serving 5,000+ active students with digital classrooms, fee management, and exam result processing.
- **Bangla AI Tutor:** Developing an in-house Qwen-based Bangla LLM tutor integrated into the MyClassRoom LMS; building it into a standalone API (student, teacher, and admin endpoints) that serves all AI features, deployed on Microsoft Azure.
- Building Q&A fine-tuning datasets from curriculum textbooks and running multi-subject evaluation suites (Bangla, English, Math, ICT, Physics) to measure and improve answer accuracy.
- Planned GPU and cloud capacity for scaling AI features (tutoring, auto-grading, quiz generation) to millions of students.
- **ChakriHub (AI-powered job portal):** Evaluated a self-hosted Qwen LLM via Ollama to cut API costs; built an Azure Communication Services email microservice (Node.js); integrated Facebook Pixel and Conversions API across React and Laravel; ran OWASP ZAP and Nikto security testing; expanded the QA test matrix to 400+ cases.
- Designed and delivers a Bengali-language Generative AI training program (8 modules covering prompt engineering, image and code generation, no-code automation, responsible AI, and a capstone project).
- Implemented a Library Management System reducing manual administrative work by 60%.
- Owned the full SDLC (architecture design, development, code review, Docker containerization, and AWS EC2/S3 deployment) across 4+ simultaneous projects.
- Mentored junior developers through structured code reviews, improving team code quality and reducing bug rates by an estimated 35%.

Key Deliverables:

- **Book Distribution Management System (Gov, NCTB):** Automated demand collection, tendering, printing, and nationwide book distribution.
- **Teachers Training & Hostel Management (Gov, NAEM):** Automated training enrollment, exams, attendance, certificates, and hostel management for educators.
- **MyClassRoom (EdTech LMS):** Online classrooms, assignments, attendance, fee management, and transcript generation.
- **Library Management System:** Catalog, borrowing rules, late fees, and student authentication.

Skylark Soft Limited *2020 – 2021*
Software Engineer Mirpur DOHS, Dhaka

- Contributed to goRMG ERP, a package-based garments ERP covering order management, costing, procurement, production, and inventory for multiple factories.
- Built a Garments Lab Testing & Management System, improving lab test tracking accuracy and compliance reporting.
- Developed an Inventory Management System reducing manual stock-management errors by 60%.
- Mentored 2 junior engineers in Laravel and Vue.js best practices, accelerating team delivery speed.

Stack: PHP, Laravel, Vue.js, MySQL, Docker

IQSA Soft *2019 – 2020*
Junior Software Engineer Shamoly, Dhaka

- Contributed to an Internet Service Provider (ISP) management platform handling connectivity, user tracking, and billing.
- Worked on an Inventory Management System using PHP/Laravel.

Stack: PHP, Laravel, CodeIgniter, MySQL, JavaScript

TECHNICAL SKILLS

Languages	PHP, JavaScript (ES6+), TypeScript, Python, SQL
Frameworks	Laravel, NestJS, React.js, Vue.js
AI / LLM	Qwen (self-hosted via Ollama), LLM evaluation, fine-tuning dataset preparation, OpenAI & Claude APIs, prompt engineering, AI chatbots, AI-assisted development (Claude Code, MCP)
Databases	MySQL, Redis (caching)
Cloud / DevOps	AWS EC2, AWS S3, Microsoft Azure (incl. Communication Services), Docker, Docker Compose, Nginx, CI/CD (GitHub Actions)
APIs & Arch.	REST API, GraphQL (basic), Swagger / OpenAPI
Testing & Security	PHPUnit, Jest (unit & integration), OWASP ZAP, Nikto
Tools	Git, GitHub, Jira, Postman, Linux, Web scraping (Python, Selenium)
Methodology	Agile / Scrum, SDLC, Code Review, Technical Mentoring

NOTABLE PROJECTS

University Automation System (ORPS) · *NestJS, React.js, MySQL, AWS S3*
Comprehensive Online Result Processing System managing course registration, grading, result processing, and exam inventory for a university.

LexChamber · *Laravel, React 19, MySQL*
Multi-tenant legal practice management SaaS for Bangladeshi law chambers with ~135 features: bilingual Bangla/English UI, court cause-list integration, deadline calculators, and bKash/Nagad payments. Built using AI-assisted development workflows (Claude Code).

BashaCheck BD (Personal Project) · *Laravel, React.js, MySQL*
Bangladesh-wide anonymous house and flat rental review platform helping tenants share and read honest reviews before renting.

EDUCATION

B.Sc in Software Engineering *2015 – 2019*
Daffodil International University, Dhaka, Bangladesh

PUBLICATION

Load Balancing of Distributed Controller in Software Defined Networking
Utilized a Mininet virtual network environment to balance data traffic efficiently across SDN controllers, improving network reliability and scalability.
