Dhaka, Bangladesh (GMT+6) | Open to Remote

## PROFESSIONAL SUMMARY

Senior Full-Stack & AI Engineer with 7+ years of experience building national-scale government systems, EdTech platforms, and enterprise ERPs with **Laravel, NestJS, React.js, and MySQL**, and now shipping **LLM products**: RAG over NCTB textbooks, self-hosted open-weight models (Qwen via Ollama), and AI features for thousands of students. Led teams of 4–6 developers on projects including NCTB's nationwide book distribution system (80% less processing delay) and an AI-powered LMS serving 5,000+ students that no longer depends on external AI APIs.

## PROFESSIONAL EXPERIENCE

### iHealthScreen Bangladesh *2021 – Present*

***Senior Software Engineer*** Mohakhali DOHS, Dhaka

- Led a cross-functional team of 4–6 developers on large-scale government projects (NCTB, NAEM) and LMS platforms, delivering all milestones on time and within scope.
- Reduced book distribution processing delays by **80%** with a nationwide automated distribution management system for NCTB (National Curriculum and Textbook Board).
- **MyClassRoom LMS:** Built an LMS serving **5,000+ active students** with AI study help, question and syllabus generation, student analytics, and AI parent reports across 4 user roles; launched on OpenAI and Google Gemini, then moved onto our in-house AI tutor so it no longer needs external AI APIs.
- **AI Online/Offline Tutor:** Developing a Bangla tutor with RAG over NCTB textbooks, answers that cite book and page, and open-weight LLMs (Qwen) served locally through Ollama; exposed as a standalone API on Microsoft Azure.
- Building Q&A fine-tuning datasets from curriculum textbooks and running evaluation suites across 5 subjects (Bangla, English, Math, ICT, Physics); planned GPU and cloud capacity to scale AI features to millions of students.
- **ChakriHub.ai:** Built AI candidate–job matching, interview simulation, and CV fraud detection without external LLM APIs for match scores; built an Azure Communication Services email microservice (Node.js); expanded the QA matrix to **400+ cases** with OWASP ZAP and Nikto security testing.
- Researched and evaluated open-weight LLMs (Llama, Qwen, DeepSeek, Mistral) and RAG architectures for self-hosted, domain-specific AI.
- **Laravel & NestJS:** Designed scalable REST API backends for government and EdTech platforms, with Redis caching and Swagger documentation.
- Implemented a Library Management System that reduced manual administrative work by **60%**.
- Owned the full SDLC (architecture, development, code review, Docker, AWS EC2/S3 deployment) across 4+ simultaneous projects, and mentored juniors through structured code reviews, reducing bug rates by an estimated **35%**.
- Designed and delivers a Bengali-language Generative AI training program (8 modules: prompt engineering, image and code generation, no-code automation, responsible AI, and a capstone project).

**Stack:** Laravel, NestJS, React.js, MySQL, Redis, Docker, AWS, Azure, Ollama, RAG

### Skylark Soft Limited *2020 – 2021*

***Software Engineer*** Mirpur DOHS, Dhaka

- Contributed to goRMG ERP, a package-based garments ERP covering order management, costing, procurement, production, and inventory for multiple factories.
- Built a Garments Lab Testing & Management System, improving lab test tracking accuracy and compliance reporting.
- Developed an Inventory Management System that reduced manual stock-management errors by **60%**.
- Mentored 2 junior engineers in Laravel and Vue.js best practices.

**Stack:** PHP, Laravel, Vue.js, MySQL, Docker

**IQSA Soft** *2019 – 2020*
***Junior Software Engineer*** Shamoly, Dhaka

- Contributed to an Internet Service Provider (ISP) management platform handling connectivity, user tracking, and billing.
- Worked on an Inventory Management System using PHP/Laravel.

**Stack:** PHP, Laravel, CodeIgniter, MySQL, JavaScript

## KEY PROJECTS

- **AI Online/Offline Tutor** · Qwen, Ollama, RAG, Azure: Bangla tutor answering from NCTB textbooks with book-and-page citations, step-by-step explanations, and math problem solving; runs on self-hosted models instead of paid APIs. (In development)
- **Book Distribution Management System (Gov, NCTB)**: Automated demand collection, tendering, printing, and nationwide textbook distribution; 80% less processing delay.
- **MyClassRoom AI-powered LMS** · Laravel, React.js, Self-hosted LLMs: Classrooms, attendance, fees, results, transcripts, plus AI study assistant, question/syllabus generation, personalised study plans, and parent reports for 5,000+ students.
- **ChakriHub.ai (AI Recruitment SaaS)** · React, Laravel, Node.js, Ollama, Azure: ATS and recruiter workflows, AI candidate–job matching, interview simulation, CV fraud detection, and automated job discovery through web crawling.
- **Teachers Training & Hostel Management (Gov, NAEM)**: Training enrollment, exams, attendance, certificates, and hostel management for educators.
- **University Automation System (ORPS)** · NestJS, React.js, MySQL, AWS S3: Online result processing: course registration, grading, result processing, and exam inventory.
- **LexChamber** · Laravel, React 19, MySQL: Multi-tenant legal practice management SaaS for Bangladeshi law chambers: ~135 features, bilingual Bangla/English UI, court cause-list integration, deadline calculators, and bKash/Nagad payments; built with Claude Code.
- **BashaCheck BD (Personal Project)** · Laravel, React.js, MySQL: Anonymous house and flat rental review platform for tenants across Bangladesh.

## TECHNICAL SKILLS

| | |
|---|---|
| **AI / LLM** | LLMs, Generative AI, RAG, AI agents, prompt engineering, open-weight models (Llama, Qwen, DeepSeek, Mistral), local LLM deployment with Ollama, OpenAI, Google Gemini & Claude APIs, LLM evaluation, fine-tuning dataset preparation, document indexing & retrieval, AI assistants & chatbots, Claude Code & MCP |
| **Languages** | PHP, JavaScript (ES6+), TypeScript, Python, SQL |
| **Frameworks** | Laravel, NestJS, React.js, Vue.js, Node.js |
| **Databases** | MySQL, Redis (caching) |
| **Cloud / DevOps** | AWS EC2, AWS S3, Microsoft Azure (incl. Communication Services), Docker, Docker Compose, Nginx, CI/CD (GitHub Actions) |
| **APIs & Arch.** | REST API, GraphQL (basic), Swagger / OpenAPI |
| **Testing & Security** | PHPUnit, Jest (unit & integration), OWASP ZAP, Nikto |
| **Tools** | Git, GitHub, Jira, Postman, Linux, web scraping & crawling (Python, Selenium) |
| **Methodology** | Agile / Scrum, SDLC, code review, technical mentoring |

## EDUCATION

**B.Sc in Software Engineering**
Daffodil International University, Dhaka, Bangladesh | 2015 – 2019

## PUBLICATION

**Load Balancing of Distributed Controller in Software Defined Networking**
Used a Mininet virtual network to balance traffic across SDN controllers, improving network reliability and scalability.

## LANGUAGES

Bengali (Native) | English (Professional) | Hindi (Conversational)
